The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-3, 7, 16, 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kazumasa (JP7016956) in view of Hiramoto et al. (US 6,668,517).

Kazumasa discloses a process and apparatus for producing a bag with a mouth member by melt bonding the tubular mouth member 1 comprising preheating mouth member 1 by radiant heat and welding the mouth 1 to flexible bag films 2; see abstract, figures. It is not clear whether or not Kazumasa provides specifics during the process such as rotating mouth member 1 of thermoplastic resin (discussion of softening of the mouth member commonly known with thermoplastic resins; see abstract).

Hiramoto teaches attaching mouth members to bag films comprising rotating tubular thermoplastic mouth members via mouth member rotator/transfer device 23 fitted to an endlessly connected moving device 22 (rotating shaft) which operates to move the mouth members and bag film through preheating station 4 and main sealing/heating station 5; see figures 1+.

The mouth member rotator has supporting members 26 that slidably supporting mouth members and support member basal ends 26a considered capable for

removably fixing the mouth member to support member; and drive unit (motor); see figures 4-6.

It would have been obvious to one of ordinary skill in the art at the time of the invention to include rotating the tubular member of Kazumasa while heating as taught by Hiramoto in order to soften the material for the heat sealing process.

Regarding claim 3, the bag is considered decompressed by sandwiching movement of sealers 4 and 5. It would have been obvious to one of ordinary skill in the art at the time of the invention to include evacuating/sucking air out of the bag during this operation in order to remove unwanted air from the bag interior.

Response to Arguments

3. Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R. Harmon whose telephone number is (571) 272-4461. The examiner can normally be reached on Monday-Friday from 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on (571) 272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
